

A SYSTEMATIC INDEX TO THE KEYS AND CATALOGUES
OF COLEOPTERA PUBLISHED IN L'ABEILLE
VOL. I, 1864 - XXXVI, 1938

by Melville H. Hatch
University of Washington
Seattle, Washington

The present index cites the keys, catalogues, and some of the other more extensive papers contained in the first thirty-six volumes of L'Abeille. The citations to keys are arranged in the sequence of Winkler's Catalogus Coleopterorum regionis palaearcticae 1924-1930, except for the Curculionidae which are arranged in the sequence of Heyden, Reitter, and Weise's Catalogus Coleopterorum Europae, Caucasi et Armeniae Rossicae, 1906. Unless otherwise noted the keys are to the species inhabiting Europe and, frequently, the farther shores of the Mediterranean.

In addition to the species covered in the keys, the first twenty-six volumes especially contain an enormous number of isolated specific descriptions translated and reprinted from other journals or descriptions of species in genera where, for one reason or another, no key was provided. So extensive is this material that few bibliographers have done it justice. It will certainly pay anyone who has a set of L'Abeille available to search it for otherwise unavailable descriptions of Palaearctic species even though it is not cited in the bibliographies.

A detailed alphabetical index should be prepared for the entire series. See Vol. XXIV, 1886-87, p. vi-x for a table of contents to the first twenty-four volumes.

I. General

DEATH NOTICE

Word has been received of the death of GILBERT JOHN ARROW,
 famous British Coleopterist. Mr. Arrow was born December 20, 1873 at
 Streatham, England. He joined the staff of the British Museum (Natural
 History) in 1896. He died October 5, 1948 after an operation. Mr.
 Arrow wrote four volumes of the famous "Fauna of British India" series,
 and over 100 papers. He particularly specialized on the families
 Scarabaeidae & Endomychidae.
